About Me

Fourth-year Artificial Intelligence Engineering student at ENSIA with a passion for building intelligent software and solving real-world problems. Experienced in Machine Learning, Full-Stack Development, Optimization, and UI/UX Design through academic and personal projects. Always eager to learn emerging AI technologies and create impactful digital solutions.

Skills

- AI & Data Science
- Machine Learning
- Full-Stack Development
- Flutter Development
- UI/UX Design
- Management Skills
- Communication
- Critical Thinking
- Leadership

Education

Mathematics Baccalaureate

high school diploma 2023

2020-2023

Graduated with an **Excellent** distinction, building a strong foundation in mathematics, physics, and analytical thinking that led to pursuing Artificial Intelligence

National Higher School of Artificial Intelligence (ENSIA)

Engineering degree in AI and Data science

2023-present

Currently a 4th-year Engineering Student specializing in Artificial Intelligence.

- Machine Learning
- Data Science & Data Mining
- Software Engineering
- Database Systems
- Mobile & Web Development

Experience

AI Research & Software Engineering Projects

Academic Projects

2024-present

- Built complete machine learning pipelines from data preprocessing to model evaluation
- **Paperou** (AI Research Monitor)
- Worked collaboratively using Git and GitHub

Mobile Application Developer

Flutter Developer (Academic Project)

2025-present

Worked on **i9amaShop**, a marketplace application.

- Developed product browsing and search features
- Integrated Supabase backend
- Implemented state management using Cubit

Machine Learning & Data Science Projects

University Projects

2025-present

- **Liquid Cooling** Forecasting
- **SomaTrack** – AI Health Prediction System
- **Flight Traffic Analysis** (Houari Boumediene International Airport)
- **SkyAI** – Drone Delivery Optimization

UI/UX & Creative Design

Personal / Academic Projects

2023-present

- **Vita** – Blood Bank Management Platform
- Designed modern websites and dashboards in Figma
- Created portfolio and social media content

Hardware & Embedded Systems

University Project

2026

- **RFID Coil Optimization** for Extended Reading Range
